THE STORY

The action takes place in Nonsensia which lies "East by West" somewhere in Europe. The King, an old man, worries a great deal about his grandson and heir, Adolf, the Crown Prince.

For some time the little country has been upset by bandits up in the mountains. They are known as The Vagabonds. Adolf is determined to rid the country of the Vagabonds and prove to the world that the future King of Nonsensia amounts to something.

With the aid of his Prime Minister and others, he makes a trip to the mountains and takes part in a strange wedding ceremony there. After the wedding he discloses his identity and wins over the ruffians. They return with him to civilization where they plan to become useful citizens.
