you of our  
Institution

# NEBRASKA AUTOMOBILE SCHOOL

1415-17 DODGE ST., OMAHA, NEBR.

The inset photograph to the right of a tire that has already done 4900 miles on a heavy car shows how the outer rows of cups preserve the absolute non-skid quality after the center rows are worn down.

Think what you gain in economy and safety when you equip these phenomenal new tires.

**Pennsylvania**

# VACUUM CUP TIRES

The only tires accompanied by a definite printed guarantee.

NOW that warm weather is upon us and wet pavements and muddy roads are the exception and not the rule, the power of the Vacuum Cup tread to make skidding impossible is overshadowed by its wonderful capacity for wear in dry weather.

This is due not alone to the great extra depth and weight of the tread, but to the remarkable radiating ability of the Vacuum Cup knobs, preventing the "heating up" which is so destructive to tires.

Any guarantee reflects the manufacturer's own experience and observation of what his product will do.

## The Only Definite Guarantee

With every Vacuum Cup Tire goes a definite and printed guarantee of 4,000 actual miles, the most liberal car weights being specified for the various sizes.

Compare this guarantee with those commonly in force.

Then consider our additional guarantee that if, after reasonable trial, you do not find your set of

Vacuum Cup Tires to absolutely prevent skidding on wet or greasy pavements, you can return them at the full purchase price. No anxious moments when you run into sprinkled pavements; no stopping to equip chains because of a sudden shower.

Think what you gain when you equip these tires, and write for the name of the nearest dealer if you don't know where to get them.

# PENNSYLVANIA RUBBER CO.

Reorganized February 1, 1910

## The Joy of Touring

rests on the ability of the engine to develop maximum power one minute and run smoothly on lowest speed the next.

### Sharp Spark Plugs

Guaranteed for one year

ignite the gases in the cylinders by *four sheets of flame*, (not by a mere spark) causing the most complete and simultaneous combustion yet possible, and enabling the motor to develop full power under all conditions.

In addition Sharp Sparks are *automatically self-cleaning*. The force of the flash through the four openings in the bullet-shaped nose keeps the firing-points free from soot and carbon. Sharp Sparks have a record of 41,000 miles without attention on a transcontinental tour.

Read about our four months' free trial offer in "Automobile Ignition," our new hand book containing a brief but complete guide to ignition troubles and their remedies. Write for it today and keep it with you when touring. It's yours free by return mail.
